

Wood Furniture - IDN.GLOBAL

About Us:

At IDN.GLOBAL, we are committed to sustainable, high-quality materials that empower businesses worldwide.

Indonesia's rich natural heritage offers a wealth of sustainable materials like reclaimed wood, with tremendous potential to drive both business growth and eco-conscious living.

Our mission is to deliver premium Indonesian furnishings, 3D wall panels, and design solutions tailored to your property or business. Each product is meticulously handcrafted by skilled local artisans, combining traditional techniques with modern aesthetics.

Focused on quality, reliability, and ethical sourcing, we ensure that every piece is not only beautiful and functional—but also earth-friendly, vegan, socially responsible, and built to support a more sustainable future.

Location: Jepara, Central Java, Indonesia

Craftsmanship:

Each furniture piece is handcrafted using traditional techniques, giving every design a distinct character. A five-step quality control process is applied to ensure consistently high standards. A blend of heritage craftsmanship and modern design is reflected through the skilled work of our artisans.

Built for Strength, Designed to Last:

Teak furniture is crafted with an uncompromising focus on quality, and ongoing improvements are continuously pursued. Each piece is subjected to rigorous drop and weight tests, along with intensive quality control, to ensure exceptional durability and stability. Independent third-party testing is conducted to guarantee reliable, unbiased performance standards.

Traditional mortise-and-tenon joinery is used to enhance structural integrity. Unlike metal fasteners, which can loosen over time due to wood movement, this time-tested method ensures long-lasting strength as the wood naturally expands and contracts.

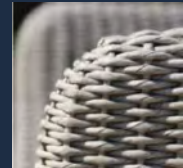

Select collections are enhanced by blending premium materials—such as stainless steel, aluminum, synthetic rattan, and slings—resulting in signature designs that are both functional and refined.

Materials Overview:

Resin (ECOLENE®)

A premium synthetic wicker, ECOLENE® is used for its durability and weather resistance. Designed to mimic natural rattan, it resists cracking, splintering, and UV damage, making it ideal for outdoor use while remaining eco-friendly.

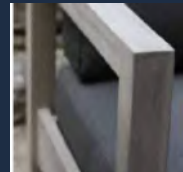

Rope

Woven rope made from polypropylene fibers is used for its strength, softness, and visual appeal. It withstands moisture, UV rays, temperature extremes, and mildew, requiring minimal upkeep.

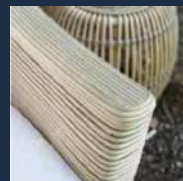

Teak

Teak wood is selected for its natural oils and long-lasting resilience against all weather conditions. Certified V-legal teak from Java and Sumatra is used, giving each piece a naturally aged appearance and unique grain.

Rattan

Sustainably harvested rattan from Southeast Asia is used for its strength, flexibility, and natural beauty. Traditional Indonesian craftsmanship is applied to create timeless indoor or sheltered outdoor pieces.

Fabric

High-performance fabrics are used for outdoor applications while offering the soft feel of indoor textiles. They are UV-resistant, fade-proof, and engineered to endure exposure to sunlight, rain, and humidity.

SVLK:

What is SVLK?

SVLK– (Sistem Verifikasi Legalitas Kayu) is a system and procedure which designed to pursue the legal verification for Indonesia wood and wood products. It assigned to implement Indonesian governments regulation related to control legality of wood trading and circulation in Indonesia. SVLK will enhance competitive advantage for the country's wood products.

Why SVLK?

Now, the demand of legality assurance of wood and products be considered as important, especially fo international market. According to Forest Law Enforcement, Governance and

Trade (FLEGT) in European Union (EU), they asked every wood resources need to have legal certification. It is a plan for fight against illegal logging and increasing forest management in the world. So, in this case Indonesia Governments participated on it. SVLK will improve governance of Indonesia's forestry business through effective administration and management thereby reducing illegal logging, illegal trading and illegal exportation.

What is Benefits SVLK for Manufacturer?

With legal certification, producer/manufacturer have more credibility of their wood products for export and expand business in international market. It makes export business for manufacturer run smoothly through system procedures and document legal of SVLK.

What is benefits SVLK for Buyer?

Company with SVLK certification give a certainty and assurance, especially for European, America, Japan, Australia market and other countries who concern that the wood and products from Indonesia Manufacturer is comes from legal authentication from upstream to downstream. It makes they import safely to their countries. Moreover, buyer who import from legal sources means they participated in safe the world form illegal logging and keep the forest sustainable.

What is V-Legal Sign?

V-Legal sign is a sign that affixed to the wood, wood products or packaging to state that it already fulfill SVLK standard. And proved with ownership of S-PHPL or S-LK (Wood Legality Certificate).

We Are SVLK Certified

Wood For Better Future

FSC Certification:

Our teak furniture is crafted using FSC-certified teak wood (*Tectona Grandis*), a premium tropical hardwood native to Southeast Asia and Indonesia. As teak trees require 50 years to mature, unsustainable logging has placed natural teak populations at risk. By sourcing only from FSC-certified plantations, we ensure that every piece of wood used contributes to responsible forestry and environmental preservation.

The Forest Stewardship Council (FSC) is a globally recognized, independent organization dedicated to promoting sustainable forest management. The FSC label guarantees that our teak is harvested with care for ecosystems, biodiversity, and local communities.

Choosing FSC-certified products is a meaningful step toward protecting the planet—allowing you to enjoy long-lasting, beautifully crafted furniture while supporting sustainability.

Shipping:

We ship via FedEx. For larger shipments, we ship via an ocean freight carrier of our choice.

Note:

All our products are handmade; please accept slight variations in color and material characteristics. We reserve the right at our discretion to make changes to the terms and conditions policy at any time without notification.

2). Furniture - From Waste Wood

Each furniture piece is truly one-of-a-kind, crafted from reclaimed wood sourced from old houses, barns, boats, trucks, or fallen branches—ensuring no two items are ever identical. The wood retains its original character, often showing marks like holes, nails, or bolts that speak to its history. When paired with natural materials such as banana leaf, cotton, or seagrass, it brings a warm, organic feel to any space.

4). Lampshades - From Natural Materials

The right lampshade can instantly transform the atmosphere of a room. For those seeking a natural, organic aesthetic, these lampshades are an ideal choice. Discover the new Bocca and Kubah abaca lampshades, crafted using a modern laminated weaving technique. They bring a relaxed, summery vibe reminiscent of a Caribbean getaway. Bright days and breezy interiors await.

5). Wood Wall Cladding

Reclaimed wood wall cladding is used to transform plain accent walls in both residential and commercial interiors. As a leading trend in modern renovation, 3D wooden panels are applied to create dynamic, textured feature walls.

Only water-based, non-toxic adhesives are used in production, and a flame-retardant top coat is applied to ensure safety. This eco-friendly process ensures the panels are safe for users and the environment.

The panels are offered in a range of styles—from cost-effective designs made with select lower-grade woods to more exclusive options crafted from A-grade and reclaimed teak. All panels are constructed using offcut or recycled wood, primarily teak, sourced from large furniture manufacturers in Java. As a result, a sustainable and environmentally friendly product is delivered.

- Direct Factory Price
- Using Kiln Dried Wood
- Box Printing is available for branding
- Individual pieces are wrapped in plastic. For display at a retail location
- and protected from scratches on the job site.
- Flame retardant coating

5.1). Pre-Installation Checklist

1. Measure your wall (length × height) and order 10% extra material for trimming and waste.
2. Unbox and inspect the wood panels.
3. Lay out and mix tiles before installation to achieve a balanced color variation, especially for painted products.
4. Refer to the layout guide if using individual tiles or planks.
5. Ensure the wall surface is clean, waterproof, and even; skim if needed.
6. Mark your starting point (top or bottom) and account for possible wall edge irregularities.

5.2). Installation Steps

1. Mark a level starting line using a chalk line or level tool.
2. Apply a ¼" thick adhesive layer above the line using a trowel, then notch it to create ridges.
3. Place the first tile flush to the guide line, press firmly, and secure it with a pin nailer.
4. Interlock and press each tile tightly against adhesive and adjacent tiles. Nail to prevent sagging.
5. Repeat across the wall, applying adhesive as needed, and maintain alignment with the level line.
6. Offset each new row as per the layout guide or your pattern.
7. Continue installing full tiles row by row.
8. For top/bottom edges, measure and cut tiles to fit, then adhere as above.
9. For side edges, measure each row and cut tiles to fit individually, then secure in place.

6). Bathroom - Unique Catalogue

Enhance your bathroom or kitchen with our handcrafted river stone basins, made from natural pebble rock shaped over time by flowing water and sun exposure. Each piece has its own distinct character and texture.

Available in a variety of natural tones, including dark gray, pearl, sand, and rustic brown, these sinks bring a unique, organic touch to any space. Our team is ready to help you find the perfect piece or develop a custom design.

7). Outdoor - Furniture Catalogue

Outdoor and indoor spaces can be beautifully enhanced with a curated blend of synthetic rattan, natural rattan, and exotic wood—crafted to complement and elevate any rattan furniture. Each piece can be styled individually or combined with custom design elements for a truly refined look.

Tailored solutions are readily provided by our expert team to meet your design vision with precision and style.

7.1). Canopy Bed

WRF-6002

Size (To Be Advise)

Auckland Daybed Canopy

8). Indoor Room - The Rattan

Natural rattan furniture manufactured using fast-growing rattan harvested from rainforest vines. Its rapid regrowth allows for sustainable harvesting with minimal environmental impact.

Rattan is valued for being lightweight yet strong. Once steamed, it can be shaped and woven into various designs. Larger poles are used for frames, while finer strands and skins are applied for weaving and decorative finishes.

9). Outdoor Living - Teak

Teak furniture is crafted using first-grade plantation-grown teak (*Tectona grandis*) sourced legally from Indonesia. Known for its natural oil content, teak is highly resistant to rot and extreme weather conditions, making it ideal for outdoor use.

Over time, the wood develops a distinguished silver-grey patina. For centuries, this durability has made teak the preferred material for marine and outdoor applications.

Traditional mortise-and-tenon joinery with teak dowels is used in most assemblies, while some designs are enhanced with stainless steel or brass hardware. A balance of comfort, function, and timeless aesthetics is ensured through years of manufacturing expertise and quality materials.

9.1). Folding Chair

Crafted from sustainably sourced, premium-grade teak, these folding garden chairs are designed for durability and easy storage. Offered in a variety of styles, they can be neatly folded to save space and are made to complement any outdoor setting. Quality and longevity are prioritized in every piece.

9.2). Garden Chair

Crafted from the finest-grade teak, these garden armchairs are built to endure harsh weather and can be left outdoors year-round with minimal maintenance. Designed for comfort and style, they are available in a variety of models to suit any outdoor space. Lasting quality is ensured in every chair.

11). Furniture - Interior Design

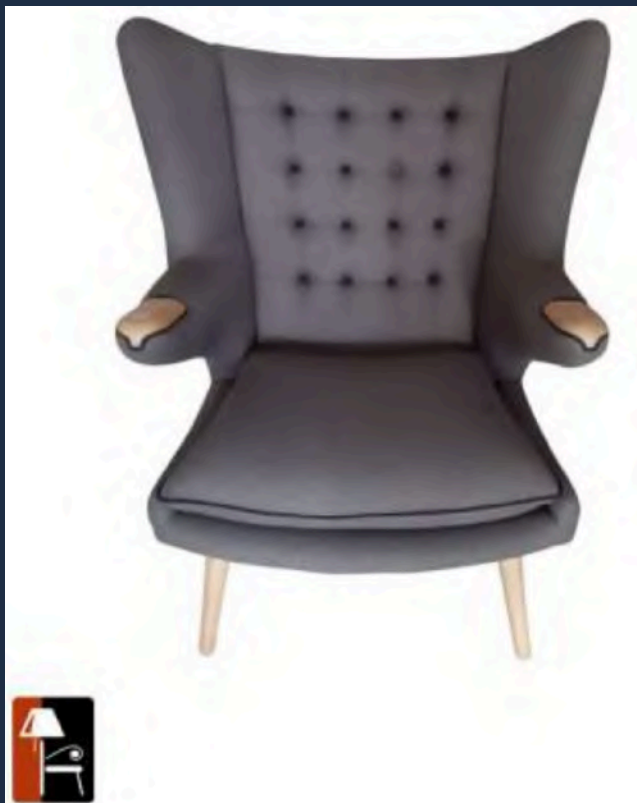

12). Teak Root - Live Edge Furniture

Crafted from reclaimed teak wood, each piece is given a new purpose as a distinctive decorative accent. Left in its natural form, subtle imperfections such as small cracks and dents are preserved, adding authentic charm and character.

Constructed from high-quality materials, long-term durability is ensured. A warm finish is applied to enhance the organic texture, making it an ideal centerpiece for dining or coffee tables and a perfect fit for any interior style.

Stool

Natural teak roots add a touch of organic texture to spaces indoors or out. Each stool has unique character, with dramatic highs and lows in the finish. Over time, teak weathers and greys in the sun for a found feel. Safe for outdoor spaces — cover or store indoors during inclement weather and when not in use. Our Organic Live Edge Round Teak Stool-End Table will make an elegant addition to any outdoor or indoor space.
